**Voopoo Vinci E 0.6Ohm 5ML Pod (1PC)**

R75.00

Voopoo Vinci E Replacement Pods - 5ml

These refillable Vinci E Cartridges are designed exclusively for the Voopoo Vinci E80 Pod Vape Kit. Each pod comes pre-installed with an integrated mesh coil and features a leak-resistant design with premium Golden Cotton wicking. This innovative cotton material supports clean, consistent flavour for up to 30 days of use per pod.

Each refillable pod has a 5ml capacity and can be topped up quickly via the top-fill port. The built-in coil and sealed construction eliminate the need for messy coil changes, making these pods a convenient and reliable option for both DTL and RDL vaping styles. Choose between 0.3ohm, 0.6ohm, or 0.8ohm depending on your preferred airflow and vapour output.

Ideal for use with 50/50 e-liquids or nicotine salts, the Vinci E Cartridges are sold in a handy pack of two.

Please Note: To improve the performance and longevity of your new Pods, always prime them with your chosen e-liquid before inserting into your device 'Priming' simply means wetting the exposed cotton or similar wicking material with e-liquid before use. This helps prevent dry hits and burning the coil should it fail to soak up e-liquid properly before firing the vape device. Once you've primed your pod, attached it to your device, allow to stand for 5-10 minutes before vaping.

Specifications

- Fixed Coil Refillable Pods
- Top-Fill, Leak-Resistant Design
- Up to 100ml Use Per Pod
- For Vinci E80 Kit Only
- Available in 0.3ohm, 0.6ohm or 0.8ohm
- Integrated Golden Cotton Wick
- Smooth, Consistent Flavour
- For Adult Smokers and Vapers Only

Features:**Brands:** VOOPOO

Geekvape Zeus Sub Ohm Tank Black

R490.00

The Geekvape Zeus Sub-Ohm Tank is the latest rendition of the highly acclaimed Zeus lineage, this time utilizing replaceable coil atomizers but maintaining the original structure of a top airflow control ring, and adding a bottom coil installation point to create a convenient performance sub ohm tank for those that prefer not to build. The new Geek Vape Zeus Sub-Ohm Tank uses mesh coil atomizers, providing a pair of kanthal mesh coils clocking in at 0.4ohm and 0.2ohm respectively. The Geek Vape Zeus Sub-Ohm Tank is leakproof, just like it's predecessors, relying on a top to bottom airflow control system to provide the proper airflow to rush through the internal coil structure. At the base is a threaded coil installation point which can be unscrewed to install or replace coils in a plug 'n' play method. Refilled using a top fill system, the Geek Vape Zeus Sub-Ohm Tank reveals two large fill ports to accommodate any nozzle size from juice bottles. In addition, the fill ports reduce the positive pressure from the tank, eliminating the possibility of leaks. Furthermore, the Geek Vape Zeus Sub-Ohm Tank can hold up to 5mL within the confines of the larger bubble glass and 3.5mL in the smaller replacement glass, respectively.

Geek Vape Zeus Sub-Ohm Tank Features:

- 26mm Diameter
- 5mL Juice Capacity
- 3.5mL Replacment Glass Capacity
- Silica Glass Reinforcement
- 304 Stainless Steel Tank Construction
- Child Safe Locking Drip Tip
- Threaded Top Fill System - Dual Fill Ports
- Top to Bottom Airflow Control System
- Geek Vape ZEUS MeshZ Replacement Coil Series
- 0.4ohm Mesh Z1 Coil - rated 60-70W
- 0.2ohm Mesh Z2 Coil - rated 70-80W
- Plug 'n' Play Coil Installation
- Threaded Bottom Coil Base Section
- 810 Drip Tip
- Threaded 510 Connection
- Available in Blue, Black, Gold, Gunmetal, SS, Red & Black, and Rainbow

Includes:

- 1 Zeus Sub-Ohm Tank
- 1 Coil Tool
- 1 3.5mL Spare Glass
- 1 0.4ohm Mesh Z1 Coil - rated 60-70W
- 1 0.2ohm Mesh Z2 Coil - rated 70-80W

- 1 Warranty Card
- 1 Spare Parts Pack
- 1 User Manual

Aspire Nexi Pro Replacement Pod 1.2Ohm (1PC)

R60.00

The **Nexi Pro cartridges** by Aspire are tailor-made for the **Nexi Pro kit**. Each features a built-in **1.2 ohm mesh coil** for even e-liquid heating, delivering **clear flavour** and an **ultra-smooth MTL draw**.

For best results, we recommend using e-liquids with **at least 50% PG**. This ensures optimal wicking and prevents dreaded dry hits.

• **Nexi Pro 1.2 ohm:** MTL – Best with PG/VG ratios from 50/50 to 70/30 – Suitable for nicotine levels up to 20 mg/ml.

These cartridges are ideal for vapers who are transitioning away from smoking and need higher nicotine strengths.
