Vaporesso Xros 4 Mini Kit

R450.00

Vaporesso XROS 4 Mini Pod Kit is an excellent choice for vapers seeking a compact, yet feature-rich device. Its robust aluminium build houses a powerful 1000mAh battery, ensuring it lasts through the day for most users. With the added convenience of USB-C fast charging, you can expect a full recharge in just about 30 minutes, minimizing downtime and enhancing your vaping experience.

The device's versatility is further highlighted by its adjustable airflow system and compatibility with the entire XROS pod range, allowing you to seamlessly switch between MTL (Mouth To Lung) and RDTL (Restricted Direct To Lung) vaping to suit your preference.

Vaporesso XROS 4 Mini Features:
• Button & Inhale Activation: Offers dual activation modes for ease of use.
• Built-In 1000mAh Battery: Provides all-day vaping capacity.
• 16W Max Power Output: Ensures a consistent and satisfying vaping experience.
• For MTL & RDTL Vaping: Adaptable to your vaping style.
• Smart Mode: Automatically recognizes the coil and adjusts power accordingly.
• Adjustable Airflow: Customize your draw from tight to loose.
• Compatible With All XROS Pods: Enjoy a wide range of vaping experiences.

Starting with the XROS 4 Mini is straightforward. Insert the pod to activate Smart Mode, which intelligently selects the optimal power output for the coil in use. You can begin vaping by either pressing the firing button or simply inhaling on the mouthpiece. The airflow slider allows for easy adjustments to the draw resistance, and the indicator light on the firing button keeps you informed of the battery's status.

Refilling the XROS pod is a breeze. Just remove the mouthpiece to top it off with up to 2ml of your preferred e-liquid. The pods are equipped with a built-in Corex mesh coil, designed for quick and even heating, thereby enhancing the flavour of your vape juice. With coil resistances ranging from 0.4 Ohm to 1.2 Ohms within the XROS pod lineup, finding your ideal vaping setup is effortless. For optimal performance, it is recommended to use these pods with e-liquids that have a 50% VG ratio.

What's in the box

Vaporesso Xros 4 Pod Kit

R580.00

3rd Place - Best Pod System at VapeCon South Africa 2024

For those on the lookout for the finest vape kits available, the Vaporesso Xros 4 Vape Kit is a shining example of versatility and user-friendly design. This kit is engineered for vapers who value simplicity without sacrificing personalisation in their vaping experience.

Vaporesso XROS 4 Pod Kit Key Features

• User-Friendly Activation: Choose between button activation or the simplicity of inhale activation.
• Long-Lasting Battery Life: The integrated 1000mAh battery ensures longevity and supports fast charging, fully recharging in just 30 minutes.
• Adjustable Vaping Experience: Capable of MTL & RDTL vaping, it adapts to different vaping styles with ease.
• Power Customisation: With a 16W max output and three adjustable power levels, it offers a tailored vaping intensity.
• Versatile Pod Compatibility: Works seamlessly with the entire XROS pod range, adding to its versatility.
• Enhanced Flavour Production: Features Corex mesh coil technology in its pods for a richer flavour in each puff.
• Easy Refill System: The 2ml pods are designed for hassle-free top filling.
• Airflow Control: Includes an adjustable airflow control slide bar for a custom draw.
• Optimal E-Liquid Compatibility: Optimised for use with 50% VG e-liquids, balancing flavour and vapour production.
In addition to its standout features, the kit comes complete with the XROS 4 device, a 0.4 Ohm pod pre-installed, an extra 0.8 Ohm pod for varied vaping experiences, a USB-C charging cable, a reminder card, and a detailed user manual. The Vaporesso XROS 4 pod kit not only excels in providing a customizable and straightforward vaping experience but also in its compatibility with a wide range of e-liquids and pod options.

Box Contents:

Vaporesso Xros Pro Kit

R650.00

The Vaporesso Xros Pro pod kit is an ideal option if you want a vape that's full of features yet still easy to use. Housing a 1200mAh battery (that can be recharged in 35 minutes) in its sturdy, compact body, it's capable of delivering a 5-30W output that's ideal for MTL (Mouth To Lung), RDTL (Restricted Direct To Lung) and DTL (Direct To Lung) vaping. This, along with a range of built-in coil pods, makes the Xros Pro easy to tailor. Each kit includes two pods, so you'll have everything you need to get started.

Features:
• 1200mAh Built-In Battery
• Inhale & Button Activated
• MTL, RDTL & DTL Vaping Styles
• 5-30W Output Range
• Smart & Variable Wattage Modes
• Adjustable Airflow
• 3ml Top-Filling Pods
• 0.4 Ohm – 1.2 Ohm Xros Pod Resistances

Setting up your Xros Pro is easy. Equipped with Smart mode, it recognises whichever coil is in your pod and will output the best wattage for it, for a no-fuss vape. If you're looking for a little customisation, the included 0.4 Ohm pod allows you to finetune the wattage output for your perfect inhale. If you're sticking with the standard Xros pods(available separately), swap between longer battery life (Eco Mode), a balanced vape (Normal Mode) or the strongest vape possible (Power Mode).

Xros pods feature a handy top-fill design that means you don't even need to remove them from the device to top them up. Just lift off the mouthpiece to reveal the filling port. The built-in coil design means maintenance is simple – once the flavour begins to fade or you notice a burnt taste, simply replace the whole pod. Furthermore, the mesh design of the coils heats your e-liquid faster, boosting its flavour. Speaking of e-liquid, Xros pods will work best with high PG vape juice

Contains:
• Vaporesso Xros Pro Vape Device
• 2 x Vaporesso Xros Pro 0.4 Ohm Mesh Pods
• USB-C Charging Cable
• User Manual

Vaporesso Xros Cube Pod Kit

R450.00   -18%   R550.00

The [Vaporesso](#) Xros Cube Vape Kit is an excellent option if you're seeking a user-friendly and compact vaping device. It's crafted for a genuine Mouth To Lung (MTL) inhale experience, generating a subtle vapour. The integrated 900mAh battery ensures a full day of use. This pod kit is compatible with refillable Vaporesso 2ml 0.8Ω and 1.2Ω refillable mesh pods Xros Pods, allowing you to fill them with your preferred e-liquid. The package includes two pods and a lanyard to kickstart your vaping journey.

Advanced Features:

Thanks to the COREX Heating Tech technology, you can enjoy any e-liquid with the XROS Cube. The adjustable airflow and high compatibility with Xros refills (excluding 0.4 Ohm cartridge) makes it suitable for any vaping preference. More importantly, the XROS Cube smartly recognizes the inserted pod and automatically adjusts the power between 11-16W, depending on the specific pod in use. The pod kit is known for its exceptional performance and its enhanced 360° illumination design lets you monitor your battery levels on the go effortlessly.

Convenient Design:

Refilling is easy through the mouthpiece port without detaching the pod. Leak-resistant technology ensures a cleaner vaping experience. The refillable pods are suitable for tight MTL or looser RDL experience with nicotine salt e-liquids. It's best with e-liquids having 50% VG or higher PG due to the mesh design of the built-in coils.

Box Contains:

• 1 x Vaporesso Xros Cube Device
• 1 x Xros refill 0.8ohm
• 1 x Xros refill 1.2ohm
• 1 x Type C USB cable
• 1 x User Manual & Warranty Card
• 1 x Lanyard

Vaporesso Luxe XR Max 2 80W Kit

R800.00

LUXE XR MAX 2

The LUXE XR MAX 2 is the latest addition to their LUXE X Pod Kit series, with upgraded features from its predecessor, the Vaporesso LUXE XR MAX. With up to 80W of power and a long-lasting 3200mAh rechargeable battery, this Vaporesso Pod Kit is built for reliable vaping and will last you all day. Compatible with LUXE XR Pods and the full GTX Coil range, Vaporesso LUXE XR MAX 2 supports DTL, RDL, and MTL vaping with high VG and freebase E-liquids. With a 0.96-inch display, adjustable airflow, and two power modes for you to choose from, this Vaporesso Vape offers you more control over your setup with a user-friendly design.

Vaporesso LUXE XR MAX 2 Features

• 3200mAh Built-In Battery (USB-C)
• Up to 80W Power Output
• 0.96" TFT Display
• DTL, RDL & MTL Vaping Styles
• Button Activated
• Smart AXON Chipset
• Adjustable Airflow & Power
• Dual Mesh Coils
• Lock Button
• Supports 70VG & 50VG E-liquids
• Compatible with LUXE XR Pods & GTX Coils
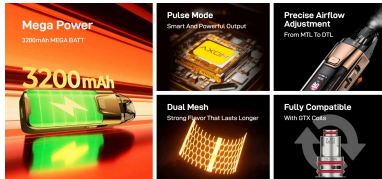

Vaporesso GTX Coil Resistance & Power

• 0.15Ω - DTL (60-75w)
• 0.2Ω - DTL (45-60w)
• 0.3Ω - DTL/RDL (32-45w)
• 0.4Ω - RDL (26-32w)
• 0.6Ω - RDL (20-30w)
• 0.8Ω - MTL (12-16w)
• 1.2Ω - MTL (8-12w)
• 1.2Ω Regular - MTL (8-12w)

Longer-lasting Battery

With a 3200mAh rechargeable battery, the Vaporesso LUXE XR MAX 2 has 14% more battery life than the previous version, the LUXE XR MAX, and a 28% increase in battery capacity when compared to other 80W Pod Kits. When it's time for a recharge, fast-charging USB-C will have you back to vaping in no time.

Adjustable Airflow & Power

Whether you prefer a smooth DTL draw or a tighter MTL hit, Vaporesso LUXE XR MAX 2 allows you to precisely adjust your airflow to suit your preferred vaping style. With two power modes for you to choose from, you can select Pulse Mode for consistent vaping with steady flavour, or switch to Eco Mode if you want to save battery.

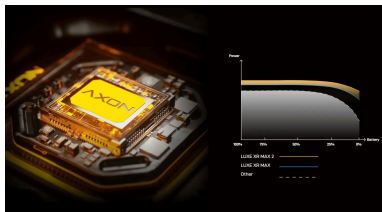

Smart AXON Chipset

Vaporesso's AXON Chipset recognises the resistance of the GTX Coil you're using and automatically adjusts the power output of your LUXE XR MAX 2 to match the optimal wattage to suit it, helping to prevent dry hits and improve coil life. The lock button at the base of the Vaporesso LUXE XR MAX 2 also keeps it from misfiring when in your pocket or bag.

0.96" TFT Screen

Vaporesso LUXE XR MAX 2 has a 0.96-inch screen that keeps you in the know with everything you need. From your battery level, vaping mode, wattage, and coil resistance, you'll be able to see all these important stats at a glance.
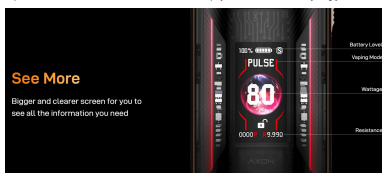

Why Choose the Vaporesso LUXE XR MAX 2?

If you're looking for a powerful pod kit with adjustable smart features and an easy-to-use design, then the Vaporesso LUXE XR MAX 2 is the perfect choice. With a long-lasting rechargeable battery, adjustable airflow and power, and AXON Chipset, this Vaporesso Vape is built for all-day vaping just the way you like.

What's in the Box?
• 1 x Vaporesso LUXE XR MAX 2 Vape Kit

OXVA Xlim Pro 2 Pod Kit

R550.00 -15% R650.00

Oxva Xlim Pro 2 Pod Vape Kit
The OXVA Xlim Pro 2 pod vape kit is a new and improved version of the popular OXVA Xlim and XLIM Pro kits. It has a powerful 1300mAh battery with 2A fast charging, enabling a wattage output of 5- 30W, perfect for all-day use without frequent charging.
The Xlim Pro 2 easily switches between MTL (Mouth To Lung) and RDTL (Direct To Lung) vaping modes. The device comes with two pods, each offering a different resistance level, so you can try both and choose your preferred vaping style.
The OXVA Xlim Pro 2 is incredibly easy to use and features a 0.56" HD Colour Display with touchscreen prompts to show vaping data, battery status, and adjust wattage. Open the rubber stopper on the top of the mouthpiece to access the fill port. Then, insert a filled pod into the device, and it will automatically adjust its output to the ideal wattage level based on your selected resistance.
You can choose between inhale or button activation and manually set a power level. Thanks to its user-friendly design, you can refill the pod without removing it from the device.
The Xlim Pro 2 is compatible with both the new OXVA Xlim Pro Replacement Pods and the previous side-filling Xlim V2 pods. A compatible range of Xlim prefilled e-liquid pods is also available for convenience.
Achieve a customized vaping experience by adjusting the airflow to your preference using the toggle conveniently located on the side of the device. Recharging the battery is hassle-free with the included USB-C cable and fast-charging capabilities.
This kit includes 2 pods with different coil resistances: the 0.8-ohm pod provides a more restricted draw, while the 0.6-ohm pod offers a slightly airier vape. For optimal results, we recommend using e-liquids with a 50VG/50PG concentration with these pods.
Always use the device according to instructions and ensure that it is out of reach of children.

The **XROS 5 Mini** is the perfect pod for beginners or anyone looking for a fuss-free device — ideal for a relaxing weekend brunch. No screen, no button, just pure vaping pleasure. With extended battery life and top-tier flavour from next-gen cartridges, the XROS 5 Mini is sure to win you over!

Compact and stylish design

With its smooth curves, textured finish, and ultra-slim format, the **XROS 5 Mini** brings elegance without the excess. Its compact size of **110.5 x 24.2 x 14.1 mm** means it fits in any pocket or bag. Lightweight and discreet, this pod is ready for anything — from coffee shops to hiking trails or stealthy office breaks.

Intuitive use for everyone

No buttons. No settings. The **XROS 5 Mini** works via **auto-draw only**: simply inhale to vape. It's fast, easy, and instinctive. Despite its minimalist approach, it still includes a **precise adjustable airflow** so you can fine-tune your draw to your liking.

Big battery, fast charge

This mini pod packs a punch with a **1500 mAh battery**, enough to last several days with moderate use. When it's time to recharge, the **USB-C 5V/2A** port ensures a quick, stable, and safe charge.
A **4-level LED indicator** keeps you informed of your battery level at a glance — no screen needed.
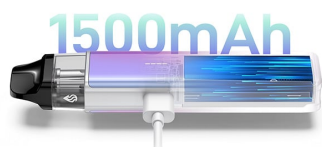

Cutting-edge vaping with Corex 3.0

The **XROS 5 Mini** comes with **XROS Corex 3.0 cartridges** — Vaporesso's latest advancement in flavour and coil longevity. With upgraded mesh, airflow chimney, and premium cotton, every draw is more satisfying than the last.
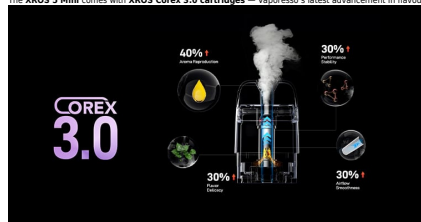

Each pod has a **3 ml capacity** and **top-fill system**. All leak-free thanks to Vaporesso's trusted **SSS leak-proof technology**.
One pod is included in the kit:
• **XROS Corex 3.0 – 0.8 ohm:** RDL draw – auto output – PG/VG 70/30 to 50/50 – nicotine up to 20 mg/ml
Need more pods or fancy trying other resistances? Find Xros Pods Here. And good news — all previous XROS pod generations remain compatible with the XROS 5 Mini.

Using the XROS Corex 3.0 cartridge

Filling

• Remove the drip tip
• Add e-liquid via the red fill port
• Reattach the drip tip

Replacing

• Remove the used cartridge
• Click in a new one
• **Tip:** When flavours weaken or a burnt taste appears, it's time to swap your pod.

What's in the Vaporesso XROS 5 Mini kit?

• 1x XROS 5 Mini battery
• 1x XROS Corex 3.0 pod – 0.8 ohm
• 1x USB-C cable
• 1x User manual

Vaporesso Eco Nano Pro

R400.00

Vaporesso Eco Nano Pro Pod Kit is designed to deliver a sustainable and satisfying vape in a slim, portable form factor. Featuring a built-in 1000mAh battery and 20W max power output, this eco-conscious pod kit is perfect for both new and experienced vapers seeking convenience, performance, and style.

One of the standout features of the Eco Nano Pro is its leak-resistant 2ml pods, ensuring a mess-free vaping experience. These refillable pods incorporate Vaporesso's Corex heating technology, which enhances both flavour and vapour production by delivering faster and more consistent heating. The built-in mesh coil, paired with Vaporesso's cutting-edge technology, makes the Eco Nano Pro ideal for mouth-to-lung (MTL) vaping, ensuring a crisp, satisfying draw and rich flavour with every puff. Plus, the top-fill system makes refilling clean and hassle-free.

The 1000mAh battery offers long-lasting performance, making the device perfect for all-day use. And when you do need to recharge, the USB Type-C fast charging feature ensures minimal downtime, bringing your device back to full power quickly. The Eco Nano Pro Pod Kit also boasts auto-draw activation, meaning you can start vaping simply by inhaling, without the need to press any buttons.

This feature, along with its compact, ergonomic design, makes the kit incredibly easy to use and pocket-friendly. Available in a range of colours, the Eco Nano Pro is not only stylish but also an environmentally conscious option, as it is designed with sustainable materials that reflect Vaporesso's commitment to reducing waste. Whether you're looking for a reliable everyday vape or something for on-the-go convenience, the Vaporesso Eco Nano Pro has you covered.

Features:
• 1000mAh Built-in Battery 20W Max Output Leak-Resistant 2ml Pods Top-Fill Design Auto-Draw Activation Corex Heating Technology for Enhanced Flavour USB Type-C Fast Charging Compact Design Partially made from recycled materials Suitable for MTL Vaping For Adult Vapers and Smokers Only

Voopoo Argus P2 30W

R550.00 **-8%** R600.00

The Voopoo Argus P2 Pod Kit features a built-in **1100mAh battery**, capable of adjustable power output ranging from 5 to 30W. It features **USB-C for charging**, aiming to reduce downtime. This kit is compatible with 2ml capacity pods, which are refillable, supporting both MTL and RDL vaping experiences due to the inclusion of 0.7ohm and 0.4ohm coils. The advanced chipset offers multiple Vaping Modes: Shift Mode, which allows for variable wattage adjustments, and three Power Modes: A key aspect of the Argus P2 is its **OLED display,** providing real-time data such as battery life, wattage settings, and coil resistance. The device supports two user modes for varying vaping experiences: precise power adjustments and a 3-level shift mode for energy efficiency and flavour optimization.

The kit's 'matchbox-style; form factor is designed for portability, including a lanyard ring for easy carrying. It is offered in a range of colours, with a metal case and a design that incorporates an OLED screen and RGB LED lights for extra visibility. Simple to use, and reliable, the Argus P2 is a great choice for a starter kit for newer vapers, or a dependable backup for more advanced kits for more experienced vapers.

Features:

Vaporesso Xros 5 Starter Kit

R650.00

Vaporesso XROS 5 Pod: levelled-up performance

XROS 5

Cross the limits, Cross super charging

After winning over vapers across the globe, the **XROS** series enters its **5th** generation. What's new? **Extended battery life**, **ultra-fast charging**, and **next-gen cartridges** for an even more refined vaping experience. Discover this sleek new pod, designed to last and built to perform.

Elegant design for stylish vaping

The **XROS 5** combines minimalism and elegance in a highly practical format. Measuring just **120.8 x 24.5 x 14.5 mm**, it fits perfectly in the hand while remaining slim and refined. Its **0.88" HD screen** gives you clear navigation and customisation, with **six visual themes** to choose from.

Available in a wide range of textured, modern finishes, this pod will please both lovers of sleek aesthetics and fans of user-friendly devices.

An ultra-intuitive experience

The XROS 5 is all about ease of use. Choose between **manual or automatic draw activation** — either press the button or simply inhale. The same button controls the user interface with intuitive shortcuts:
• **One press** to vape
• **Two presses** to change theme
• **Three presses** to adjust power level or mode
• **Four presses** to access options
• **Five presses** to turn the pod on or off

Adjustable power for a tailored vape

The XROS 5 offers three preset power levels:
• **ECO** for a lighter puff and better battery life
• **NOR** for a balanced vape
• **PWR** for a more intense hit

Each mode auto-adjusts based on the coil in use, making it foolproof — even for beginners. One exception: **the 0.4 ohm XROS cartridges support manual wattage adjustment between 5W and 30W** (ECO/NOR/PWR presets are not available on this version).

Loose airflow
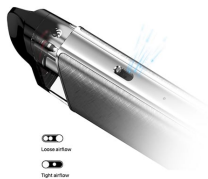

Tight airflow

Thanks to its **adjustable airflow**, you can fine-tune the draw — tight and precise for MTL, or more open for an airier RDL experience. Simple, efficient, and instinctive.

A battery that goes the distance

The 5th generation of the XROS now includes a **1500 mAh built-in battery** for multi-day vaping. And when it's time to recharge, the **ultra-fast 5V/3A charging** gets you up to **80% in just 20 minutes**. If that doesn't keep you powered up...

1500mAh Mega Batt

Super Charge, Power Lasting

With 3A rapid charging, waiting time is significantly reduced, resulting in a better vaping experience.

Next-gen XROS cartridges

The XROS 5 introduces you to **XROS Corex 3.0 cartridges**, Vaporesso's latest innovation for even purer flavours and longer-lasting coils. Featuring a honeycomb mesh, redesigned airflow chimney, and upgraded cotton, everything has been optimised to take your vape to the next level.

Each pod has a **3 ml e-liquid capacity** and is **top-filled** for convenience. And thanks to **SSS leak-proof technology**, your pockets and fingers stay dry.

This kit includes two pods:
• **XROS Corex 3.0 – 0.6 ohm:** RDL – auto output – PG/VG 50/50 to 40/60 – up to 12 mg/ml nicotine
• **XROS Corex 3.0 – 0.8 ohm:** RDL – auto output – PG/VG 70/30 to 50/50 – up to 20 mg/ml nicotine

Need more pods? Grab your [XROS Pods Here](#). And don't worry – all previous XROS pods remain compatible with the XROS 5.

How to use XROS Corex 3.0 cartridges

Filling

• Remove the drip tip
• Fill through the red fill port
• Reattach the drip tip

Replacing the cartridge

• Remove the used pod from the device
• Snap in a new Corex 3.0 pod
• **Good to know:** Always prime a new cartridge by letting the coil soak in e-liquid for 10 minutes before use. If flavour fades or you notice a burnt taste, it's time to replace it.

What's in the Vaporesso XROS 5 Kit?

• 1x XROS 5 battery
• 1x XROS Corex 3.0 pod – 0.6 ohm (pre-installed)
• 1x XROS Corex 3.0 pod – 0.8 ohm
• 1x USB-C cable
• 1x User manual

Vaporesso Vibe SE Starter Kit

R300.00

Complicated vaping is a thing of the past, welcome to the era of plug n play. Vaporesso's **Vibe SE** pod is the perfect example. Compact, lightweight and damn easy to adopt... it follows you everywhere, always ready to serve you a delicious puff of vapour. Ready to let yourself be carried away by the Vaporesso vibe? Let's get down to it.

A simple design with a colourful look

The Vibe SE pod is simple yet fun. Its slim, compact size**(115.9 x 26.6 x 17.6 mm**, **50 g**) fits in any pocket, while its smooth coating makes it a pleasure to hold every day.

When it comes to colours, Vaporesso hasn't cut any corners, offering options that won't go unnoticed. If you prefer to keep a low profile, don't panic, there are still two colours to suit you perfectly.

Vary the pleasures with a flick of the
wrist

The Vibe SE pod has two modes of use: **ECO** to save battery life and prolong the life of your coil, and **PWR** for a little more kick and a denser vapour. Switch from one mode to the other using a small switch. The chipset intelligently adjusts the power according to the cartridge installed, for perfectly calibrated vaping without having to think. Activation is automatic on inhalation**(auto-draw)**, so there's no need to bother with buttons.

A battery that keeps up

With its built-in **1100 mAh** battery, the Vibe SE has plenty of battery life to keep you going all day, or even longer if you're not too quick on the uptake. Charging is via a **5V/1A USB-C port** on the side of the pod. An LED indicator shows the battery status at a glance.
• **Green** from 100% to 70%.
• **Blue** from 70% to 30%.
• **Red** from 30% to 0%.

Vaporesso Armour GS Kit

R770.00

The **Vaporesso Armour GS Pod Kit** is the perfect choice for vapers who value customisation, performance, and reliability. Powered by a removable 18650 battery, this pod kit offers an adjustable wattage range of 5-80W, making it adaptable for various vaping styles, including Mouth-to-Lung (MTL), Direct-to-Lung (DTL), and Restricted Direct-to-Lung (RDTL). Whether you're chasing dense clouds or intense flavour, the Vaporesso Armour GS delivers a tailored vaping experience.

Key Features

• **Customisable Wattage (5-80W):** Fine-tune your device for your preferred vaping style and e-liquid type.
• **Removable 18650 Battery:** Flexible power options with swappable batteries for uninterrupted vaping sessions.
• **GTX Coil Compatibility:** Supports Vaporesso's renowned GTX coils, including 0.15Ω and 0.3Ω mesh coils, for intense flavour and rich vapour.
• **Armour G Series Pod:** A generous capacity pod with a top-fill system and SSS leak-resistant technology to prevent mess.
• **Smart Vaping Modes:** Includes Pulse Mode for consistent hits, Eco Mode for extended battery life, and Smart Mode for ease of use.
• **Top Airflow System:** Enhances leak protection while improving airflow for a smoother draw.
• **Interactive Display:** 0.96-inch TFT colour screen with three dynamic themes for easy navigation.
• **Durable Design:** Scratch-resistant, weatherproof construction ensures the device stands up for daily use.
• **USB-C Fast Charging:** Quick and convenient recharging with the latest charging standard.

Who Is It For?

The **Vaporesso Armour GS Pod Kit** is ideal for:
• **Versatile Vapers:** Enjoy both MTL and DTL styles with adjustable airflow and coil options.
• **Sub-Ohm Enthusiasts:** Low-resistance GTX coils deliver dense vapour and unbeatable flavour.
• **Beginner to Intermediate Users:** Smart Mode simplifies operation for those new to vaping, while advanced users can enjoy customisation.
• **On-the-Go Vapers:** Compact and durable for portability without compromising on performance.

Rincoe Manto Nano A2 Kit

R300.00 -40% R500.00

The Rincoe Manto Nano A2 Kit is crafted to enhance your vaping journey with a perfect blend of style, performance, and convenience. Whether you're an experienced vaper or just starting out, this sleek and versatile device offers a reliable and feature-rich solution to meet your needs.
Key Features:
Integrated Rechargeable Battery: Enjoy the ease of a built-in battery that provides power throughout your day.
Multiple Color Options: Choose from a range of stylish colors to match your personal aesthetic.
Generous Vape Juice Capacity: Less frequent refills mean more uninterrupted vaping enjoyment.
Type-C Fast Recharging: Quick and efficient recharging with a modern Type-C USB port ensures minimal downtime.
Innovative Filling System: Easy, mess-free refills keep your vaping experience hassle-free.
Multiple Protections: Safety features like overcharge protection and short-circuit protection offer peace of mind.
Magnetic Connection for Pod Cartridges: Seamless and secure pod changes with a strong magnetic connection.
Futuristic Display Screen: A clear display provides essential vaping data, including output power, time of vaping, and resistance.
Stylish and Compact Design
The Rincoe Manto Nano A2 stands out with its modern design and multiple color options, allowing you to express your style while enjoying a premium vaping experience. Its compact size makes it perfect for on-the-go vaping, fitting easily into your pocket or bag.
Powerful Performance
Equipped with an integrated rechargeable battery, this device ensures ample power for your vaping sessions. The Type-C fast recharging feature allows you to quickly get back to vaping with minimal downtime.
User-Friendly Design
The innovative filling system simplifies refills, ensuring they are easy and mess-free. The magnetic connection makes pod changes seamless and secure, while the futuristic display screen keeps you informed with all the necessary vaping data at a glance.
Safety First
The Manto Nano A2 is designed with multiple protection features, including overcharge protection and short-circuit protection, to ensure a safe vaping experience. You can vape confidently, knowing your device is built with safety in mind.
Versatile Vaping
With a generous vape juice capacity and customizable vaping options, the Manto Nano A2 is ideal for both beginners and experienced vapers. Its versatility makes it a top choice for anyone seeking a reliable, high-performing vape.
Conclusion
The Rincoe Manto Nano A2 Pod System combines style, performance, and convenience in a compact package. With its sleek design, powerful battery, user-friendly features, and robust safety protections, it is the perfect companion for vapers seeking a high-quality, versatile vaping device. Elevate your vaping experience with the Rincoe Manto Nano A2 and enjoy seamless, satisfying sessions wherever you go.

Aspire Magnum E-Sisha Starter Kit

R500.00   ~~R750.00~~

aspire

MAGNUM
More Clouds, More Attitude

An e-hookah experience with the quality and efficiency of Aspire gear? We say YES! Discover the Magnum kit: an ultra-easy-to-use e-shisha that's cut out to treat you to an abundance of tasty vapour. There's no adjustment or anything else, just fun and pleasure with this full auto system with integrated resistor cartridges. Not to mention its dashing design... Anyway, let's not waste any more time and find out more about this magnum opus of e-shisha vape.

The practical, well-thought-out design of the Magnum kit from Aspire

If you like items that make a statement while remaining ultra-practical, you'll love the Magnum from Aspire. Measuring **148.5 x 34 x 34.6 mm**, it fits perfectly in your hand, and its **ergonomic tubular design** ensures a natural grip. You can even easily keep an eye on your e-liquid level thanks to a small, cleverly placed window. But that's not all: Aspire has opted for **quirky colours** that stand out from the crowd, just to add a touch of fun to your vaping sessions. We do regret the absence of a colour featuring Tom Selleck.

The show doesn't stop there, the Magnum is equipped with **pretty LED lights**. These lights aren't just there for style (although they do pop), they also serve to **indicate the battery level**. There's no need to guess whether your e-shisha has any juice left: it shows you clearly with every puff. If you're looking for a little more discretion, the LEDs can be turned off using the power switch on the underside of the battery.
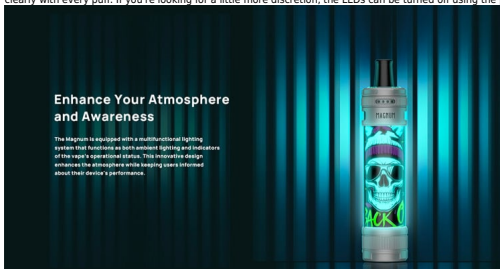

Enhance Your Atmosphere and Awareness

The Magnum is equipped with a multifunctional lighting system that functions as both ambient lighting and indicators of the vape's operational status. This innovative design enhances the atmosphere while keeping users informed about their device's performance.

Intuitive, no-fuss operation

There are no complicated menus, no hidden buttons and no need for a background in electrical engineering to use it. The Magnum is **plug & vape** in its purest form. **There's no adjustment** to make: it automatically adapts its power to the cartridge installed. And how do you activate it? Nothing could be simpler: **a simple pull is all it takes**, thanks to its **auto-draw** system. No fire button, no risk of accidentally pressing it when you put it in your pocket. You inhale, it responds. That's all there is to it.
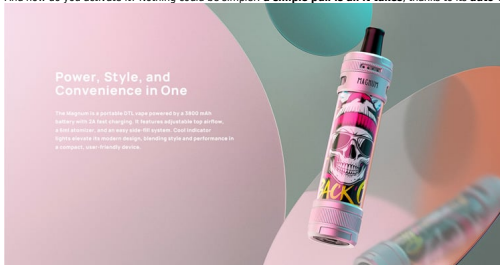

Power, Style, and Convenience in One

The Magnum is a portable GTL vape powered by a 3800 mAh battery with 2A fast charging. It features adjustable top airflow, a bold atomizer, and an easy side-fill system. Cool indicator lights elevate its modern design, blending style and performance in a compact, user-friendly device.

Maximum autonomy with the Magnum battery

When you talk about electronic shisha, you talk about extended sessions, and for that reason Aspire has equipped the Magnum with a **large integrated 3,800 mAh battery**, which means long hours of vaping without worrying about recharging. Translation: long hours of vaping without worrying about recharging.
And when it does need recharging, no stress: thanks to its **USB-C port and 2A fast charge**, it quickly recovers energy to get going again.

A Quick Boost for All-Day Enjoyment

The Magnum vape comes with a powerful 3800 mAh built-in battery and 2A fast charging. A quick charge during downtime is all you need to enjoy a full day of perfect vaping.

3800 mAh
built-in battery

2A
fast charging

3800 mAh

Magnum cartridges: XXL vapour and top flavour

Magnum doesn't do things by halves, and it shows in its cartridges too. With a **6 ml tank**, you can take one puff after another without having to refill every five minutes. You'll be able to keep an eye on your e-liquid level thanks to a cleverly placed little window.

No Mess, More Vaping

The Magnum features a 6.0 ml pod capacity and a convenient side-fill system, allowing for easy refills without mess. This ample capacity ensures extended vaping sessions, so you can enjoy your favorite e-liquids for longer periods without frequent interruptions.
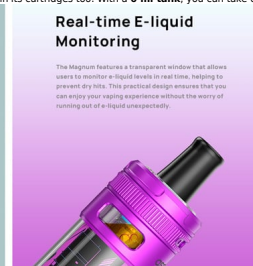

Real-time E-liquid Monitoring

The Magnum features a transparent window that allows users to monitor e-liquid levels in real time, helping to prevent dry hits. This practical design ensures that you can enjoy your vaping experience without the worry of running out of e-liquid unexpectedly.

Aspire Cyber GT Starter Kit

R490.00

The Aspire Cyber GT Vape kit is designed to make vaping much more accessible to the average user, the Cyber GT kit is a device that offers the exact vaping experience your looking for. With a host of customizable features. Seamlessly blending advanced technology with user-centric design, its built for both Restrict Direct-to-Lung (RDTL) and Mouth-to-Lung (MTL) vaping.

Discover the Art of Vaping

Housing a robust 2400 mAh built-in battery, the Aspire Cyber GT is a device designed to be used all day if you want it. When its time to recharge it, the 2A fast-charging capability via its USB Type-C port means that you never have to wait too long, letting you get back to vaping swiftly. Beyond that, you tailor the vaping experience precisely how you like it.

The device offers three adjustable wattage levels, ECO, Normal and Boost, that you can quickly with three quick presses of the fire button. It also offers three activation modes: auto-draw, button activated, and a combination mode that allows you to match your preferred inhalation style.

Adjustable 3 Wattage Levels
Simply press the fire button three times quickly to switch between the three constant wattage levels, giving you easy and precise control over your vaping experience.

ECO   NORMAL   BOOST

Futuristic Design, Ergonomic Feel
The Cyber GT showcases a sleek, streamlined design infused with Cyber-inspired elements, offering a comfortable and ergonomic grip.

Three Sets of Indicator Lights
Three sets of smart and intuitive indicator lights provide clear information on wattage level, activation mode, battery status, and other key device details, ensuring a seamless and informed user experience.
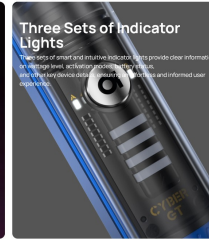

With a sleek, cyber-inspired aesthetic using clean lines and an ergonomic grip, the Aspire Cyber GT kit brings both style and comfort. This innovative design is enhanced by three indicator lights that offer a clear view of wattage levels, which activation mode you're on, and the battery status at a glance.

Power That Keeps Up With You
The Cyber GT comes with a high capacity 2400 mAh built-in battery for lasting performance throughout the day. Its 2A fast charging feature minimizes downtime, letting you recharge swiftly and get back to using it without delay.

2400 mAh	Up to 3 Days	2A
Battery Capacity	Use	Quick Charging

You can even customize the aesthetic, with multiple colours available, including Black, Pink, Blue, Green and Grey.
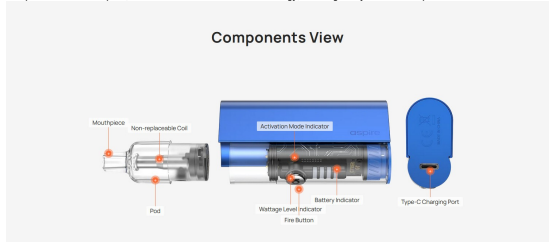

TG Pod Compatible
The TG Pod system is compatible with the Cyber G, Cyber G Slim, and Cyber GT devices. The pre-installed 0.8Ω TG Pod is perfect for cloud-chasing enthusiasts, providing dense vapour production. Meanwhile, the 1.0Ω TG Pod is ideal for nicotine salts, offering a smooth, authentic flavour experience that's second to none.

0.8Ω   2.0 ml   3.0 ml

1.0Ω   2.0 ml   3.0 ml

Easy Side Refill System
The TG Pod features a user-friendly side refill system meticulously designed for effortless operation with a primary focus on user convenience. This innovative system not only streamlines the refilling process but also ensures a completely leak-free vaping experience.

Compatible with the TG pods, this device uses meshed coil technology, ensuring that your flavour experience is as full and as it is consistent. The user friendly side-fill system makes refilling effortless and leak free.
