Geek Bar 911 GTS 18,000 Puff Disposable Vape

R290.00

Geek Bar 911 GTS Disposable

The Geek bar 911 GTS is a game-changer in the disposable vape market, offering an impressive 18,000 puffs with a rechargeable design and a robust 5% nicotine strength. This device is not just about performance; it's a statement of style and innovation, inspired by the iconic Porsche 911 with its classic liveries.

One of the key features of the Geek bar 911 GTS is its 2.0-inch color screen, a leading display in the industry that provides users with an immersive visual experience. The screen not only enhances the aesthetic appeal of the device but also offers essential vaping information at a glance.

The dual firing mode and dual coil technology of the 911 GTS ensure a strong and consistent flavor delivery. Whether you prefer a direct lung hit or a mouth-to-lung draw, this vape adapts to your vaping style, providing a tailored experience. The dual mesh coils are engineered for instant dual heating, ensuring a quick and efficient vapor production, backed by a 20W power boost for an extra punch.

Aspire Vape King x Nexi One Kit

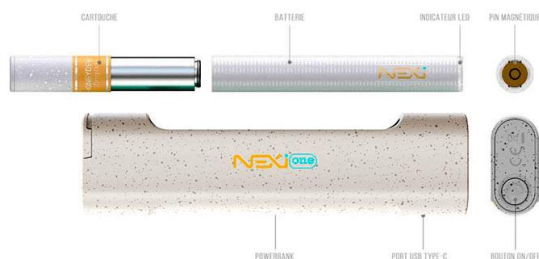

R250.00 **-17%** R300.00

If you're here, chances are you want to quit smoking, but haven't yet found the system that will make the difference. Well, the system that will make the difference is precisely the one that has no difference to the cigarettes you started to puff on while hiding in the school toilets a few years ago. Well you'll find a few differences actually, like the absence of tar or carbon monoxide to name but a few. Once you've got your Nexi One in your hand, or rather between your index and middle fingers, you'll feel right at home. Thanks to its size, weight, coating and tight draw, this e-cig delivers sensations more than similar to traditional cigarettes, making it one of the best to help you quit smoking.

Nexi One kit: A practical, discreet design.

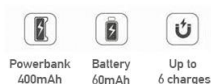

Always on the cutting edge, manufacturer Aspire impresses us once again with the simple, well-thought-out design of this Nexi One kit. This kit consists of a powerbank in which your e-cigarette is housed. All in a format that won't take up any more space in your pocket than a lighter bought in a gas station. With a flick of the wrist, you'll be able to slide your e-cig out of its powerbank for a quick puff. Aspire provides you with a nice selection of colours for your powerbank, so you can choose your favourite colour, again as with the gas station lighters. Aspire quality obliges, this kit makes use of materials of great solidity and lightness so you can take it everywhere with you.

Nexi One Kit: Simple, realistic use.

The Nexi One requires no adjustment. You take it out of the powerbank and inhale, the puff will automatically trigger in a millisecond thanks to its chipset's **autodraw** system. The Nexi One e-cig offers a tight **MTL** draw, so you'll need to exert a fairly powerful inhalation as you would with a conventional cigarette. You don't teach an old dog new tricks, so you'll come through like a champ if you've ever had a cigarette in your mouth, otherwise you can go away, because if you don't smoke, don't vape.

Nexi One kit: A puff always at hand.

Between the **400 mAh** of the powerbank and the **60 mAh** of the e-cigarette, you have a total of 460 mAh of autonomy, enough to vape for a good while between recharges. The Nexi One e-cigarette charges magnetically every time it's in the powerbank, just don't put it the wrong way round (LED side down). As a result, your Nexi One is always ready to be drawn for a quick puff. The powerbank will be able to charge your e-cig up to six times, after which you'll need to recharge the powerbank via **USB-C** (cable not supplied). You can turn the powerbank on or off by pressing the power button five times in succession. What's more, the chipset gives you safe vaping with its batch of protections against overheating, short circuits or overcharging.

CHIPSET ASPIRE ASP 6 PROTECTIONS

PROTECTIONS (MOD)

PROTECTIONS (POWERBANK)

The Nexi cartridges: the heart of the Nexi One system.

Without them, your Nexi One would be nothing. Nexi cartridges are the ones that provide flavour and, above all, the holy nicotine you want so badly and that will enable you to quit smoking effectively. Nexi pods are pre-filled cartridges with **1.2 ml** of e-liquid dosed at **70 mg/ml** nicotine for an intake tailored to people looking to quit smoking. These cartridges are fitted with **1.6 ohm** Nickel-Chromium coils, which are to thank for that realistic tight draw.

To install a Nexi cartridge on your Nexi One, nothing could be simpler, just screw it onto the battery, so it will take the place of the filter on your electronic cig. These cartridges are single-use, so once the liquid has run out, simply install a new cartridge.

Warning: Nexi cartridges are sold separately, so discover all the flavours available on Freevape.

Replacing the Nexi cartridge:

- Unscrew the used cartridge from the battery.
- Screw in a new cartridge.

Dimensions of the Aspire Nexi One kit:

90mm x 9mm

Nexi One kit contains:

- 1x Nexi One battery
- 1x Nexi One powerbank
- 1x user manual

Features:

Brands: Aspire

BLVK Elite 40K Disposable Vape (Ice & Nicotine Adjustment)

R350.00

Redefining the Frost Factor. Elite power meets icy precision in the **BLVK 40K ELITE - Ice Edition**, where every draw is a masterstroke of control and clarity.

Why settle for standard when you can command? With NIC CONTROL™ dial technology, your vape responds to you. Crank it up when the moment demands intensity, or smooth it out for that laid-back chill. It's personalized power in the palm of your hand.

Every detail engineered for domination:

- **Pure Ice Flavor Mastery** – BLVK's bold taste meets an avalanche of cooling clarity.
- **NIC CONTROL™ Dial** – Take full ownership of your nicotine strength.
- **Mesh Coil Performance** – Consistent clouds. Consistent flavor. Every time.
- **Smart LED Display** – Battery and e-liquid levels? You're always informed.
- **USB-C Rapid Charge** – Speed meets stamina—charge up and stay in play.
- **Leak-Resistant Design** – Built clean. Built tough. Built for movement.

40,000 puffs. 1 device. Zero compromises. This isn't your average puff—it's your statement of control, style, and sophistication.
