Airistech Herbva 5G Herb Vaporizer

R800.00

The Herbva 5G is one of Airistech's newly released portable dry herb vaporizer. This new vape pen is a great option for those looking for something portable, efficient and affordable. There are some pretty neat features on the new Airistech Herbva 5G. First off, it has a universal micro-usb charging port. This means that you can charge your vape with almost anything. Pretty much all vape charging cords will work. Even most Android cell phone chargers will be able to charge this vaporizer. Secondly, it is really portable. It's only 105MM long and just 21MM deep. It'll fit easily in your hand or pocket because it's so small. The third reason that's so great is the ceramic heating chamber. A ceramic heating chamber is great for low or high temp vaping. Another thing about a ceramic chamber is that it won't affect the flavor of your dry herb.

Features and Specs

- For Dry Herb
- Magnetic Mouthpiece
- 1000 mAh Li-Polymer Battery
- 3 Temp Settings: 390°F / 405°F / 420°F
- Deep Ceramic Chamber
- Fast Heat Up Times (15 Seconds)
- Cost Friendly

Package Contents

- **1x** Airistech Herbva 5G
- **1x** Flat Mouthpiece
- **1x** Glass Mouthpiece
- **1x** USB Charging Cable
- **1x** Cleaning Brush
- **1x** Dab Tool
- **1x** User Manual

Grenco Science G Pen Elite

R2,500.00

The G Pen Elite® is an ergonomically designed portable convection vaporizer featuring a full LED display with temperature control, battery life indicator, and all-ceramic heating chamber. The G Pen Elite boasts the largest fully ceramic chamber on the market, with a revolutionary 360 ceramic heating element that provides fast and even convection vaporization of ground material from all sides. With the capability of setting any desired temperature between 200° - 428°F (93° - 220°C), users can experiment with low temperature true vaporization to explore optimal flavor profiles. This innovative technology opens up an entirely new vaporizing experience with unrivaled performance, taste, and effects.

Powered by a combination of the highest grade lithium-ion battery and smart-chip technology, The G Pen Elite is a high-performance vaporizer that sustains battery life for extended use. Designed and engineered for portability, the G Pen Elite is the perfect marriage of form and function, making it the ideal solution for efficient vaporization on the go.

Airistech Mystica Ace CBD Vaporizer

R370.00

Experience the ultimate in discretion and portability with the Mystica Ace Wax/CBD Cartridge vape kit from Airistech. Known as true pioneers in vaporizer innovation, Airistech continues to set new standards with the Mystica Ace.

The Mystica Ace is a compact marvel designed for ultimate portability and versatility. It features all the essential elements of a modern vape device, and then some. The device includes an LED display to indicate battery and wattage levels, ensuring an effortless and informed vaping experience. Its adjustable wattage provides optimal performance every time, and the oil level window lets you monitor your concentrate levels to avoid running dry.

The Mystica Ace offers both auto-draw and manual button draw modes for seamless use.

Additionally, it boasts dual charging ports compatible with both Type-C and Lightning chargers, making it incredibly convenient.

Available in Ivory Black, Peacock Green, Silk White, and Blue/Purple Gradient, the Mystica Ace is as stylish as it is functional.

Specs:

- Auto Draw/Manual Button Draw Mode
- Magnetic Connection
- LED Display
- Adjustable Wattage
- Oil Level Window
- Dual Charging Ports

Yocan Blade Dabbing Hot Knife

R627.00

The Yocan Blade is more than just a dab tool; it's a game-changer that elevates your dabbing experience while ensuring optimal extraction from your concentrates. This electric dab tool is designed with the user in mind, featuring a high-capacity battery that guarantees flawless sessions every time. What sets it apart are the dual ceramic blades, offering you the flexibility to choose the perfect blade for your specific concentrate type. With the Yocan Blade, precision, efficiency, and unmatched extraction are the keys to success.

Here are the benefits of using this battery-operated dabbing tool:

Reliable Battery Power: The Yocan Blade Dabbing Knife is equipped with a robust 400mAh rechargeable battery, ensuring sufficient power for all your dabbing needs. This capacity is well-suited for smaller, portable devices, allowing extended usage without the need for constant recharging. Unlike other hot knives, the ceramic tip is not power-hungry, which means the battery can last for days, making it an essential tool for precisely extracting your concentrates.

Charging is a breeze thanks to USB type-C technology, a feature shared across many of Yocan's vaporizers, adding to your convenience. With the Yocan Blade, you can count on long-lasting power and a hassle-free charging experience.

An Affordable Alternative to Yocan Black JAWS: Yocan has introduced its new sub-brand, Yocan Black, which includes products like the Yocan Black JAWS Hot Knife & Thermometer. While the Yocan Blade may not come with extravagant extras, it offers essential functionalities that cater to your daily dabbing needs at a more budget-friendly price.

The Yocan Blade is an excellent choice for those in search of an affordable hot knife to efficiently handle wax concentrates. Whether you need precise microdosing or regular use, the Blade has you covered. So, if you're looking for a cost-effective yet efficient solution for your dabbing adventures, the Yocan Blade is a wise decision.
