

Cotton Bacon V2.0 by Wick 'n' Vape

R90.00 **-36%** R140.00

Cotton Bacon "V2" has undergone an extra process to eliminate all the natural cotton oils. So it has no break in period. And it's a little more absorbent and heat resistive than V1.

Specifications :

- Engineered by Vaper's for Vaper's
- GMP certified, traceable medical grade cotton
- 10cm length, heavy body, easy to use bacon strip
- U.S. grown dual fiber for optimal wicking and heat resistance
- No more break-in. 100% Tasteless wick.
- User friendly, resealable travel size package.

Features:

Brands: Cotton Bacon

OFRF nexMESH Mesh Sheets 0.13Ohm (10PC)

R120.00

The OFRF nexMESH Coils are prebuilt perforated metal sheets made of Kanthal A1 and are specifically designed for the WOTOFO Profile RDA. Each nexMESH coil has a resistance of 0.13Ω with a recommended wattage range between 60W and 70W. The nexMESH coil has a unique micro weave netting with 3 times more holes than the WOTOFO Mesh Style Coil, resulting in quicker ramp up times and reduced spit back.

Specifications:

- Material: Kanthal A1
- 16mm by 6.8mm Diameter
- 0.13Ω
- Recommended Wattage Range: 60W - 70W

Features:

Brands: OFRF

Octocotton

R25.00 **-58%** R60.00

Octocotton, the new kid on the block. Pure wicking pleasure for tanks and drippers Octocotton has the cleanest flavour you will ever taste. The Octopus is the genius of the ocean world and just like this cotton can use their brains to sort out any problem - the problem here being slow wicking and that awful cotton taste. Octocotton wicks fast and has no cotton taste right off the bat this means that just like a real octopus this cotton is flexible and works with any build and any flavour. All you get is tentacles of crisp, clean cotton to make your vaping experience pleasureable!

Specs:

- 10 Grams net weight
- 10 Strips per a bag

Features:

- Zero Cotton Taste
- Suitable for RBA/RTA/RDA/RDTA
- Pure Organic Cotton Fiber
- Large fibers designed for sub-ohm use
- Pharma Grade
- Zero Bleach
- No actual octopuses were harmed in the making of this cotton

Cotton Bacon Prime

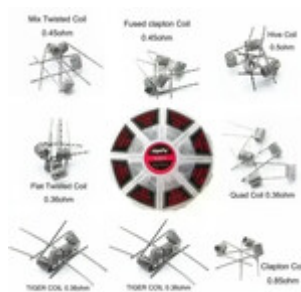

R100.00

PRIME is our newest cotton wicking material and was developed specifically with RTAs, RDTAs, and squonking in mind. PRIME uses a different strain of cotton that has naturally thicker fibers. These thicker fibers allow the cotton to absorb liquid **at least 33% faster** (seriously, we measured)! PRIME is still everything you love about Cotton Bacon V2, but with even faster wicking! That means no dry hits and no break in time. It's tasteless, free of impurities, natural oils, and pesticides. Use it anywhere you'd use V2, and especially in a tank or squonk situation! Each bag of PRIME includes 10 strips of cotton and includes our unique "Scratch and Reveal" product authentication sticker

Features:

Brands: Cotton Bacon

Vapefly 48PC Pre-Made Coil Box 8-in-1

R120.00

Features:**Brands:** Vapefly**HellVape N90 Competition Wire 25G**

R50.00

HellVape N90 Competition Wires

HellVape has finally released their competition wires, perfect for cloud chasers. Available in 23g or 25g, this wire has a lower resistance per length compared to even Nichrome 80, due to the extra 10% of nickel composition comparatively. It will heat up noticeably faster and is a preferred alternative to kanthal for many cloud chasers for this reason.

Resistance:

- 23G .09ohm /INCH
- 25G .11ohm /INCH

Note: When it comes to using RDA, RTA, and RDTA, we strongly recommended to wash and clean all the atomizers thoroughly and carefully. Likewise, please have a great sense of knowledge when it comes to handling and using these products.

We always strongly recommend testing the coils with ohm-meter before using them with your mods, devices and batteries. Coils with low resistance are not suitable with all mods, devices and batteries. Please make sure that your mods, devices and batteries can handle low resistance before using them.
